

Your **Global** Testing, Inspection & Certification Partner

SPECIAL OFFERS: 16 CFR 1203 U.S. Bicycle Helmet Testing

Bicycle helmets are designed to prevent people's head injuries during exercise and play an important role in protecting people's lives!

The United States Consumer Product Safety Commission (CPSC) stipulates strict quality regulations of bicycle helmet. If imported products cannot pass the stated regulations by the U.S. Customs, the failed products have to be withdrawn and recalled from the market while the manufacturers and exporters will take legal responsibilities.

STC is one of the CPSC accredited third-party laboratories (ID:1064). We provide comprehensive safety testing services of bicycle helmets which will be sold to the United States (including 16 CFR 1203 full testing and Helmet Raw Material Chemical Testing Services).

From now on, all clients apply for 16 CFR 1203 Testing Services:

32% OFF

50% OFF for the same application with the second head type (same applicant)

One-off retest service

Regulations and Testing highlights (including but not limited to):

Product precondition

Impact attenuation test

Roll-off resistance test

Dynamic strength of retention system test

Peripheral vision test

Chemical test

Labeling test

● ● ● and more.

STC is also accredited by China National Accreditation Service for Conformity Assessment (CNAS) and offers one-stop testing services for European standard EN 1078 and Australian standard AS/NZS 2063.

STC has continuously committed to delivering excellent services with the support of experienced professionals. We offer bicycle helmet safety testing services which comply with standards in the United States, Europe, and Australia in the aspects of evaluation, pre-testing, and rectification programs to ensure your products meet the international standards.
